Nepal,Biratnagar

SUMMARY

Results-driven Python Developer and Generative AI enthusiast with hands-on experience building intelligent, NLP-powered applications — including AI chatbots, resume analyzers, multi-agent systems, and automated code review tools. Proficient in Python, LangChain, RAG architectures, and LLM API integration, with a solid foundation in data analysis using NumPy and Pandas. Currently advancing expertise in supervised and unsupervised Machine Learning. Proven ability to independently deliver full-cycle AI projects with real-world impact, combining strong analytical thinking with a passion for practical AI innovation.

TECHNICAL SKILLS

Languages & Web: Python, HTML5, CSS3, JavaScript

AI / ML Frameworks: LangChain, RAG (Retrieval-Augmented Generation), FAISS, ChromaDB, OpenAI API, Generative AI, NLP

ML Concepts: Supervised Learning, Unsupervised Learning, Linear Regression, Classification, Clustering, Data Preprocessing

Data & Visualization: NumPy, Pandas, Matplotlib, Seaborn

Tools & Platforms: Git, GitHub, VS Code, Antigravity

Core Competencies: Prompt Engineering, API Integration, Algorithm Design, Automation, Debugging, Software Development

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering *Sep 2023 - Apr 2027*

Aditya College of Engineering and Technology (Autonomous), Surampalem, Andhra Pradesh, India

- Relevant Coursework: Object-Oriented Programming, Database Management Systems, Artificial Intelligence, Computer Networks.

PROJECTS

AI-Powered Job Finder Application *Python | Generative AI | NLP*

- Developed an intelligent job search tool that filters and ranks opportunities based on user skills, roles, and interests using AI-based relevance scoring, reducing manual search effort by ~60%.
- Integrated NLP-based skill extraction to dynamically match candidate profiles against live job listings.

Intelligent Resume Analyzer *Python | NLP | Generative AI*

- Built an NLP-driven evaluation engine that extracts key skills, benchmarks them against job descriptions, and generates actionable improvement suggestions for ATS and recruiter optimization.
- Applied Generative AI to produce human-readable, context-aware feedback — improving resume quality through targeted recommendations.

Generative AI Chatbot *Python | LangChain | LLM APIs*

- Designed and deployed a conversational AI chatbot using LangChain pipelines and LLM APIs, delivering contextually accurate, human-like responses to complex user queries.
- Implemented advanced prompt engineering strategies to improve relevance, coherence, and reduce hallucination rate.

Multi-Agent AI Collaboration System *Python | LangChain | Generative AI*

- Architected a multi-agent AI framework in which specialized agents autonomously handle reasoning, data analysis, response generation, and task automation - demonstrating production-level AI orchestration.
- Designed inter-agent communication protocols to enhance task parallelism and overall system throughput.

AI-Powered Code Review Assistant *Python | Generative AI | NLP*

- Created an automated code analysis tool that detects bugs, flags anti-patterns, and delivers Generative AI-driven fix suggestions, significantly reducing manual code review overhead.

Text-to-Image Generation System *Python | Generative AI*

- Implemented a text-prompt-driven image generation pipeline using modern Generative AI techniques, producing creative and photorealistic outputs from natural language descriptions.

NLP Text Summarization Tool *Python | NLP | AI Models*

- Developed an abstractive and extractive summarization engine that distills lengthy documents into concise, meaningful summaries - improving information retrieval efficiency for end users.

Real-Time System Health Monitor *Python | Automation*

- Built a real-time monitoring dashboard tracking CPU utilization, RAM consumption, disk I/O, and overall system health using Python automation libraries, enabling instant diagnostics.

INTERNSHIP / EXPERIENCE

Web Development Intern - SkillDzire *May 2025 - June 2025*

- Engineered responsive, cross-device web pages using HTML5, CSS3, and JavaScript, ensuring seamless UX across mobile and desktop viewports.
- Collaborated within an Agile workflow, contributing to code reviews and iterative feature delivery while maintaining consistent design standards throughout the project lifecycle.
- Implemented UI/UX enhancements that improved visual consistency and page load experience across the platform.

CERTIFICATIONS

Generative AI Fundamentals - Oracle *2025*

Python Essentials 2 - Cisco Networking Academy *2025*

Python Essentials 1 - Cisco Networking Academy *2025*

Communicative English – Cambridge 2025
